EDUCATION

Amsterdam University Of Applied Sciences (HvA)

2026 - 2027 (Expected)
MSc Applied Artificial Intelligence

2022 - PRESENT
BSc Software Engineering

- **Minor**: Applied Artificial Intelligence
- **Minor**: Mobile Development

SKILLS

Languages & Frameworks:
TypeScript, JavaScript, Python, Kotlin, React Native, Expo

AI & Automation:
LLM Fine-tuning, Transformers, Computer Vision, RPA, Predictive Modeling, XAI

Data & Infrastructure:
SQL, Supabase, Firebase, Data Engineering, PowerBI, Git

Soft Skills:
Approachable, Rapid Skill Acquisition, Self-Directed, Agile Team Player, Solution Oriented

LANGUAGES

Dutch: Primary
English: C1

PROFILE

Full-stack Software Engineer bridging AI and mobile development. Delivered 1.5 years of AI automation as an RPA Developer at Tata Steel, and independently launched the mobile app "Tracks & Taps". Pursuing an MSc in Applied Artificial Intelligence at Amsterdam University of Applied Sciences, to specialize in building autonomous intelligent agents and advanced machine learning systems.

WORK EXPERIENCE

Ams. Univ. Of Applied Sciences | Student Mentor **Sep 2026 - Present**

- Guiding applied AI students through core curricula, providing feedback on algorithmic code, and coaching on software design principles.

Tracks & Taps | Founder & Lead Developer **Nov 2025 - Present**

- Architected a gamified tour app from scratch using React Native and Supabase, implementing a one-time consumable token model.

Tata Steel Nederland **Sept 2024 – Present**

- **HRM Data Analyst Intern** *(Mar 26 -Present)*
  Conducted socio-technical research for SAP SuccessFactors to optimize enterprise talent management.
- **RPA Developer (Part-time)** *(Feb 25 – Feb 26)*
  Deployed AI Document Understanding models for order automation and executed critical enterprise server migrations.
- **RPA Developer Intern** *(Sept 24 – Feb 25)*
  Automated legacy mainframe pricing systems, driving a 90% reduction in manual processing effort.

The Swap Club | Mobile Developer (School project) **Nov 2025 – Feb 2026**

- Engineered and optimized core product pages for a mobile circular economy platform using React Native.

DEPT® Agency | Android Developer (School project) **Mar 2025 – June 2025**

- Built a Kotlin application integrating OpenAI-powered chatbots and advanced image recognition.
- Delivered highly accessible UI components while collaborating within a professional Agile environment.
